About Armand Products Company

Armand Products Company is the only U.S. producer of Potassium Bicarbonate. Established in 1986, Armand Products is a joint venture of Occidental Chemical Corporation and Church & Dwight Co., Inc. Our two modern ISO 9001:2015-certified production facilities in Muscle Shoals, Alabama, operate 24 hours a day, 365 days a year. Through active research and development efforts, we seek to continuously improve product performance and anticipate the needs of our customers.

The Potassium Bicarbonate Manufacturing Process

Potassium bicarbonate is produced by reacting potassium carbonate with carbon dioxide, then recrystallizing it. All equipment used from production to packaging is dedicated solely to potassium bicarbonate.

Pure potassium carbonate, also manufactured right at our ISO-certified Muscle Shoals facility, is produced from potassium hydroxide. This control of all aspects of the manufacturing chain helps to achieve the highest possible standards of purity, while conforming to the Good Manufacturing Practices set forth by the FDA.

General Properties of Potassium Bicarbonate

Potassium bicarbonate is a GRAS food ingredient. It is an odorless, noncombustible, white crystalline powder. It is stable under normal conditions. Potassium bicarbonate contains no toxic chemicals and is not listed as a carcinogen or potential carcinogen. For an MSDS or additional product and safety information call Technical Service.

Empirical formula	KHCO_3
CAS number	298-14-6
Appearance	White granular powder
Taste	Slightly salty
Molecular weight	100.12
Solubility in alcohol	Insoluble
Alkali equivalent	1 lb. $\text{KHCO}_2 = 0.471$ lb. K_2O
Acid equivalent	1 lb. $\text{KHCO}_2 = 0.365$ lb. HCl
Carbon dioxide equivalent	1 lb. $\text{KHCO}_2 = 0.440$ lb. CO_2
pH, 1% solution at 77° F	Approximately 8.2
Technical Grade Flow Agent	MgO less than 0.99%
Solubility in Water	
32°F (0°C)	17% by weight
68°F (20°C)	23% by weight
104°F (40°C)	30% by weight
140°F (60°C)	37% by weight
Thermal Decomposition	Decomposes without melting into K_2CO_3 , H_2O , and CO_2

IV. Grades and Packaging

USP Grade - Potassium Bicarbonate meets the U.S. Pharmacopoeia and the Food Chemical Codex (FCC) chemical test requirements.

50 lb. bag
300 lb. drum

Food Grade - Potassium Bicarbonate is produced in compliance with the Food and Drug Administration's regulations pursuant to the Food Safety Modernization Act. Also meets FCC, cGMP, GFSI, Kosher and Halal standards and is produced at our SQF Certified Facility.

50 lb. bag
300 lb. drum

ACS Grade - Potassium Bicarbonate meets the chemical requirements set by the American Chemical Society for reagent quality chemicals.

100 lb. drum
300 lb. drum

Packaging requirements visit our website (<http://www.armandproducts.com>) or contact Technical Service.

V. **Functionality...**

Discover the Versatility of Potassium Bicarbonate

- ◆ Classified by the FDA as a food ingredient “generally recognized as safe” (GRAS)
- ◆ A strong buffer with mild alkalinity
- ◆ Less caustic than carbonates and hydroxides
- ◆ Gentle reactivity for controlled neutralization
- ◆ Thermal stability up to 350° F
- ◆ Water soluble
- ◆ Dissolves quickly
- ◆ A convenient source of carbon dioxide in baking applications
- ◆ A corrosion inhibitor
- ◆ A convenient source of potassium

VI. End Uses

Fire Extinguisher Ingredient

- ◆ Dry powder fire extinguishers
- ◆ Efficient fire extinguishing agent for Class B (flammable liquids and gases) and Class C (electrical) type fires
- ◆ Automatic release systems for fire prevention
- ◆ Airfield, petrochemical, naval and other commercial applications
- ◆ Scavenger of acidic fire by-products

Agriculture – Soils

- ◆ The absorption of potassium by soils is enhanced by the bicarbonate
- ◆ Reduces the loss of cations in acidic or neutral soils and increases the action of phosphate fertilizers
- ◆ Corrects soil pH, reduces acidity

Agriculture Fertilizer – Crops

- ◆ For crops where the use of KCl is detrimental
- ◆ Potatoes – larger protein and starch yield
- ◆ Tobacco – reduces leaf size but improves color and burn properties
- ◆ Alfalfa – Speed drying process of cut crop or decrease drying time of cut crop

Feed

- ◆ When used as a nutritional supplement, potassium bicarbonate is reported to give increased feed consumption and weight gain in livestock

Catalyst

- ◆ Polymerization of synthetic fibers
- ◆ Dehydrogenation of olefins

Food and Beverage

- ◆ electrolyte replenisher and potassium supplement
- ◆ Used in foods as a leavening agent, pH control agent, and a nutrient supplement (e.g., infant formulations)
- ◆ A processing aid in extruded foods
- ◆ Foaming and fizzing agent in instant beverages
- ◆ Serves as a color preservative in foods

Other Uses

- ◆ Impregnated paper or cellulose can be used as a filter to remove HCN and other acidic gases from tobacco smoke
- ◆ Household odor remover
- ◆ An accelerator in fast setting cements
- ◆ Used in aqueous resin-based coatings and adhesives
- ◆ High-temperature polymer blowing agent
- ◆ Detergent builder
- ◆ Hair and skin products

Q&A

How can I get a product sample or place an order?

Simply call Customer Service and we will be happy to send you a sample for evaluation or take your order.

Are there experienced people with whom I can discuss specifications, packaging, end uses, safety and other technical requirements over the phone?

Yes, contact a Technical Service representative.
